## PROFESSIONAL SUMMARY

Analyst and full-stack developer who translates business requirements into working software. Over 4 years analyzing processes, gathering and documenting requirements, and resolving cross-functional issues to documented closure in a regulated operations environment. Builds, deploys, and supports production web applications end to end with Next.js, React, TypeScript, and PostgreSQL, including an internal operations tool integrating a federal contracting API. Seeking full-time business analyst or software engineering work in the Oklahoma City metro.

## CORE COMPETENCIES

Requirements Gathering & Documentation · Business Process Analysis · Full Stack Development · REST APIs & System Integration · Relational Databases & SQL · Data Analysis & Reporting · Root-Cause Analysis · Cross-Functional Stakeholder Communication

## WORK EXPERIENCE

### Freelance / Self-Employed

2024 - Present

#### Full-Stack Web Developer — Oklahoma City, OK

- Gather requirements from non-technical business owners, define scope, and deliver working software: built an internal operations tool for Patriot Logistic Solutions, a federal contracting firm, integrating the SAM.gov API to surface NAICS-coded contract opportunities, consolidate contract documents, and track contracts through their lifecycle on a kanban board
- Design, build, test, deploy, and support three production web applications end to end in Next.js (TypeScript), React, and PostgreSQL for clients in federal contracting, apparel e-commerce, and hospitality (patriotlogisticsolutions.com, gsdesignresearch.com, hanjanpochaok.com)
- Develop and integrate RESTful web services including a Stripe-powered checkout for GS Design Research, an Oklahoma apparel brand, modeling relational data for inventory, products, orders, and discount codes exposed through a headless CMS for client self-service
- Monitor and troubleshoot production performance for Han Jan Korean Kitchen, a restaurant client, resolving Core Web Vitals issues in Google Search Console on a site drawing ~17K monthly impressions and ~400 organic clicks (Jun. 2026)

### Cytovance Biologic

Mar. 2023 - Jun. 2025

#### Quality Control Analyst — Oklahoma City, OK

- Analyzed processes and coordinated updates to procedures, specifications, and hazard analyses, verifying alignment with changing regulatory requirements and process changes before release
- Performed root-cause analysis with cross-functional teams to resolve complex issues, documenting corrective actions through to closure so problems did not recur
- Compiled and analyzed operational and analytical data for reporting, identifying trends and delivering reports to stakeholders on established timelines
- Managed controlled documentation and change control in MasterControl, tracking each record through review and timely revision against regulatory requirements

### Cytovance Biologic

Mar. 2021 - Mar. 2023

#### Manufacturing Associate — Oklahoma City, OK

- Executed and documented operations in a regulated production environment, reviewing records for accuracy, correcting errors promptly, and escalating quality concerns to appropriate personnel

## EDUCATION

### Bachelor of Science in Chemical Engineering — University of Oklahoma

Dec. 2020

## SKILLS

**Software Development:** Next.js | React | TypeScript | JavaScript | Python | HTML/CSS | Full Stack Development | Responsive Design | Production Support & Monitoring | AI-Assisted Development (Claude Code)

**Data & Systems:** PostgreSQL | SQL | Relational Data Modeling | REST API Design & Integration (Stripe, SAM.gov) | Sanity CMS | Data Analysis & Reporting | Statistical Analysis

**Business Analysis:** Requirements Gathering | Business Process Analysis | Technical Documentation | Change Control | Root-Cause Analysis | Cross-Functional Coordination | Microsoft Office Suite (Word, Excel, Visio)
